Subject: CES Gate Codes
Date: Friday, August 08, 2014 12:15:11 AM

Hello

The current gate codes are:

Wayland (EPA): (b) (6)
Griggs (TCEQ): [REDACTED]

We will be demobed today. We are awaiting ditch water sample (residential), soil samples (residential), air samples (residential and site), TT407 and TT408 samples (waste samples). Most will be recieved next week.

We repaired the open fencing along wayland and on the east side of facility along with some board repairs. We also weedeated some of the more heavily impacted drainage ditches and impacted yard areas and collected the clipping and placed them on site.

We may need to talk about the results of these samples next week especially the soil samples.

Gary
